

# WILD DUBLIN

## *Exploring Nature in the City*

### Tree Timelines

When you have discovered how old your tree is, you can use the tree time line below to record all the things that you think the tree might have seen.

Start with the bottom boxes and try to find out what might have been happening as the tree grew.

- \* You can include either local events or events from anywhere in the world.
- \* Can you mark a line on the tree when you were born?
